 compass

Adrianow (Adrianov) Meteorological
 Instrument

The instrument consisted of a wire frame, two calibrators revolving within the frame, a tin metal directional disc revolving on a wooden pole 2 m. in length, which could be folded. The entire instrument was oriented as to N with the aid of the Adrianow compass. This instrument, used at the chemical course and also by the Cml Plat, 62d Inf Regt, was packed and transported in a wooden box, 30 to 45 cm. in length, 30 to 45 cm. in width and 30 cm. in depth. DS-561 admitted that the instrument was old in appearance.
